IT'S A TEST DONE ON ANIMALS TO FIND THE TOXICITY OF SHAMPOOS OR COSMETICS IN DEVELOP-MENT.
HAVE YOU HEARD OF THE DRAIZE TEST?
THE TEST SUB-STANCE WON'T FLOW OUT OF A RABBIT'S EYES.
RABBITS DON'T DEVELOP TEAR GLANDS SO THEY CAN'T CRY.
DO YOU KNOW WHY THEY USE RABBITS?
THEY PUT DROPLETS OF THE TEST SUBSTANCE INTO ONE EYE OF A RESTRAINED RABBIT REPEATEDLY FOR SEVERAL HOURS AND OBSERVE, COMPARING IT TO THE OTHER EYE.
THEY'RE ALL KILLED WHEN IT'S OVER THOUGH.
SO THEY'RE PERFECT FOR ANIMAL TESTING
RABBITS DON'T MAKE NOISE
ROT.
AND LITTLE BY LITTLE...
A RABBIT'S EYES WILL GET ULCERS FROM THE DRAIZE TEST,
YOU'D BETTER BE CAREFUL.

BUT I'M SCARED, MAN!!!
I DON'T KNOW WHAT JUST HAPPENED,

Zindryr seys: So, I cleened, trensleted, proofreed, end typeset this whole thing. Amazing, I know. I'm a man of many talents. One of my other talents includes having people actually willing to look at my shit work and then fix it.

Ballzy seys: zesty zind's work requires NO QC beceuse he hes THE POWER. Pile all work on him from now on! Also stop using shampoo and makeup.

Not_Log says: Man, we need more manga about the horrible things the corporate mechine does.

We are still recruiting cleaners and typesetters.
